

List of mass shootings in the United States in 2018

This is a **list of mass shootings in the United States that have occurred in 2018**. Mass shootings are incidents involving multiple victims of firearm-related violence. The precise inclusion criteria are disputed, and there is no broadly accepted definition.^{[2][3]}

Gun Violence Archive, a nonprofit research group that tracks shootings and their characteristics in the United States, defines a mass shooting as an incident in which four or more people, excluding the perpetrator(s), are shot in one location at roughly the same time.^[4] The Congressional Research Service narrows that definition, limiting it to "public mass shootings", defined by four or more victims killed, excluding any victims who survive.^[2] *The Washington Post* and *Mother Jones* use similar definitions, with the latter acknowledging that their definition "is a conservative measure of the problem", as many shootings with fewer fatalities occur.^{[5][6]} The crowdsourced Mass Shooting Tracker project has the most expansive definition of four or more shot in any incident, including the perpetrator in the victim inclusion criteria.^[7]

There were 323 mass shootings in 2018 that fit the inclusion criteria of this article, resulting in 387 deaths and 1,283 injuries, for a total of 1,670 victims.
